RE: Parking Inventory White Paper – Red Line BRT Corridor
CC: Stephen Goodreau (CDM), Greg Saur, PE, PTOE (CDM), Mike McBride, PE (ASI)

Study Purpose

An inventory was taken of the existing on-street parking along the Red Line BRT corridor in order to determine the impact of displaced parking spaces due to the new BRT infrastructure. A cost analysis is to be conducted to determine the cost to purchase the displaced parking spaces. Metered and unmetered parking spaces were documented as part of the inventory. The metered parking spaces are operated by the City of Indianapolis parking vendor, Park Indy. Unmetered parking spaces are open to free parking unless specified otherwise.

Parking Inventory Data Collection

A parking inventory was performed for the following roadways (as shown in **Figures 1 – 6**):

- Washington Street (Delaware Street to Capitol Avenue)
- Maryland Street (Delaware Street to Capitol Avenue)
- Capitol Avenue (Maryland Street to 19th Street)
- Illinois Street (Maryland Street to 18th Street)
- Meridian Street (18th Street to 38th Street)
- College Avenue (38th Street to Broad Ripple Avenue)
- Virginia Avenue (Prospect Street to New Jersey Street)
- Shelby Street (Hanna Avenue to Pleasant Run Parkway)

Parking data was collected in the field on the weekdays of June 16-17, 2015, then confirmed via Google Street View as of the date of this study May 30, 2017. The total number of metered and unmetered parking spaces were summarized for predefined intermediate segments along each roadway. The following data was recorded for each segment: roadway start-to-end, side of street, type of parking space, number of spaces, parking provisions, and surrounding land use type. **Table 1** provides a summary of the parking inventory. **Attachment A** provides a detailed breakdown of the parking inventory for all the roadway segments.

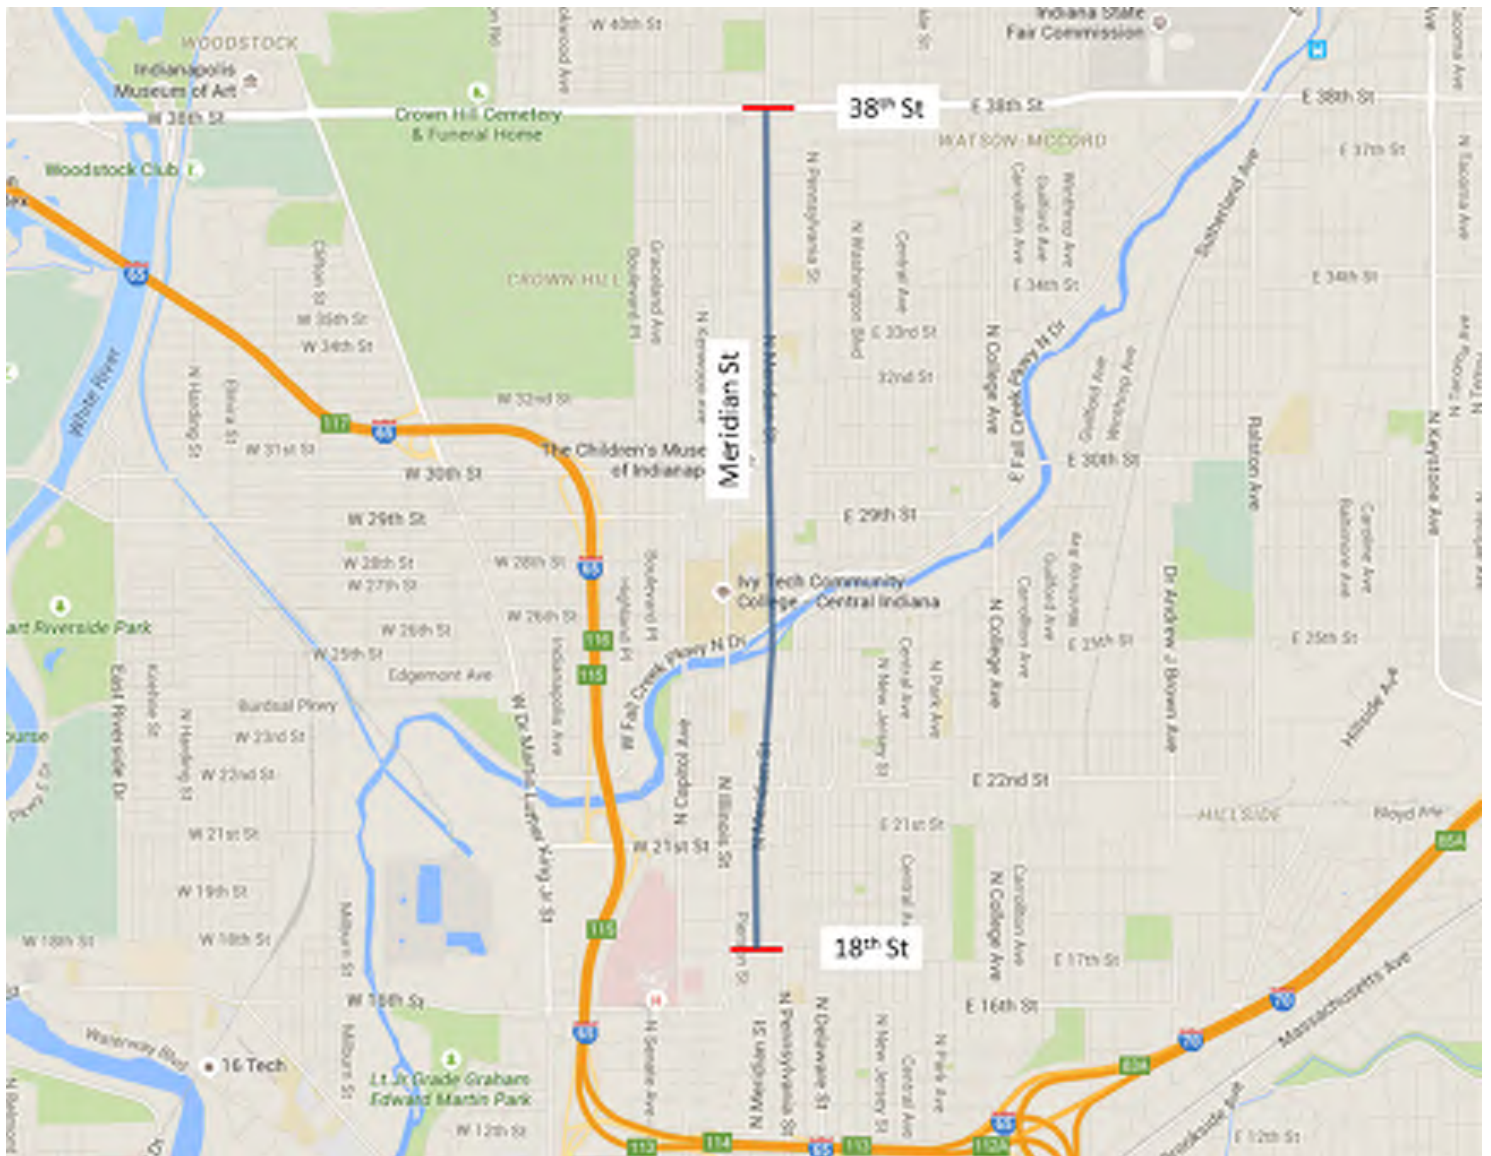

Figure 3 – Meridian Street Parking Inventory Limits

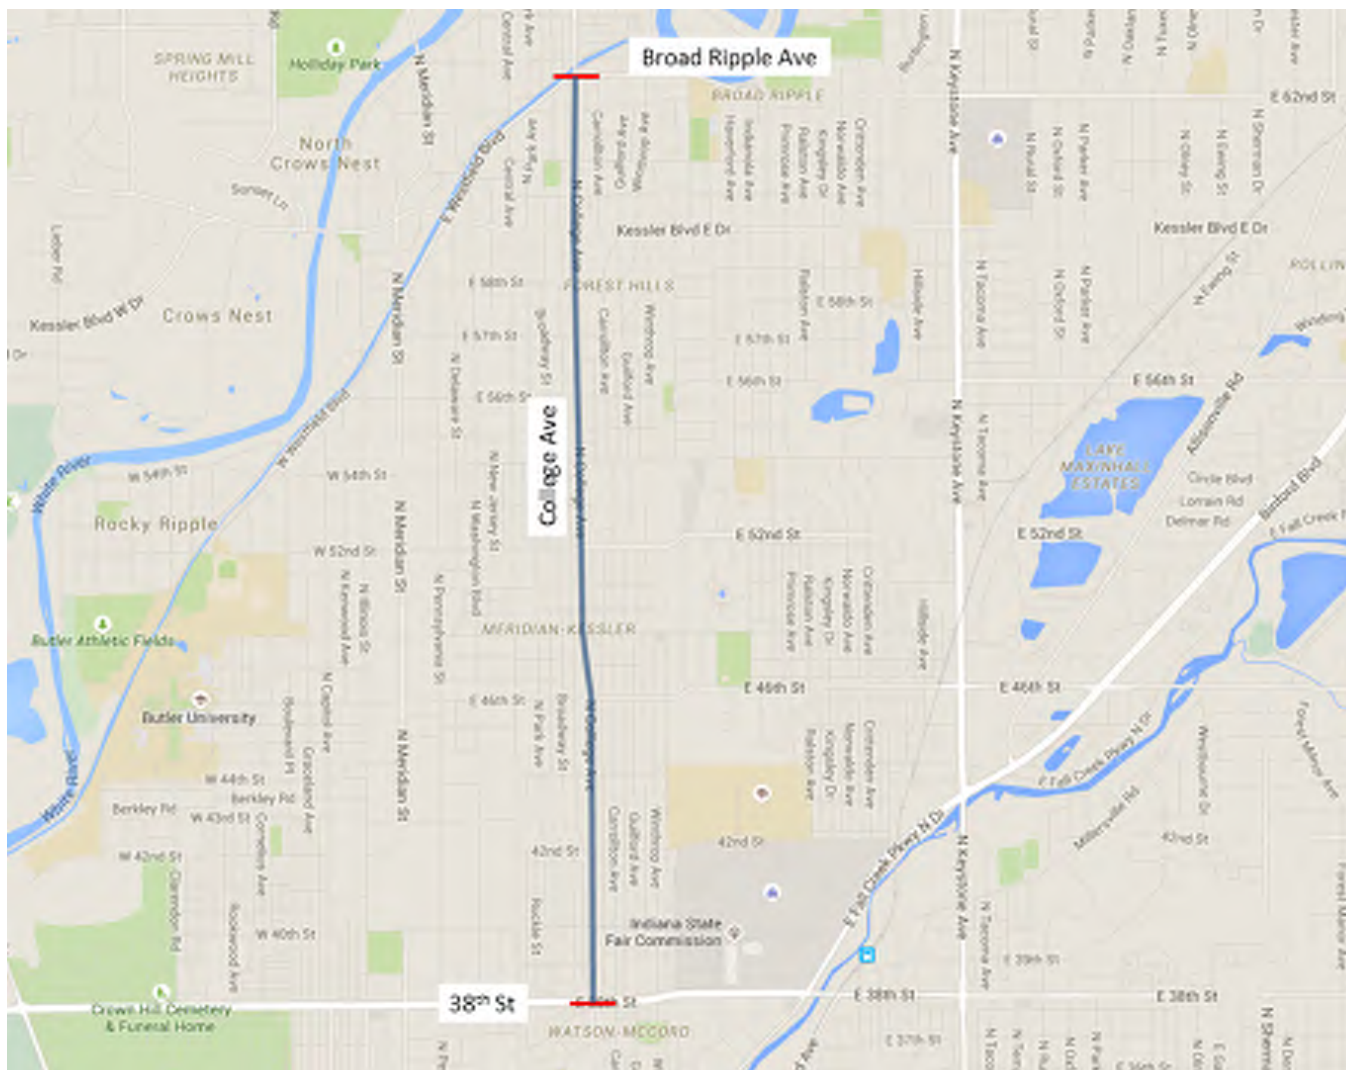

Figure 4 – College Avenue Parking Inventory Limits

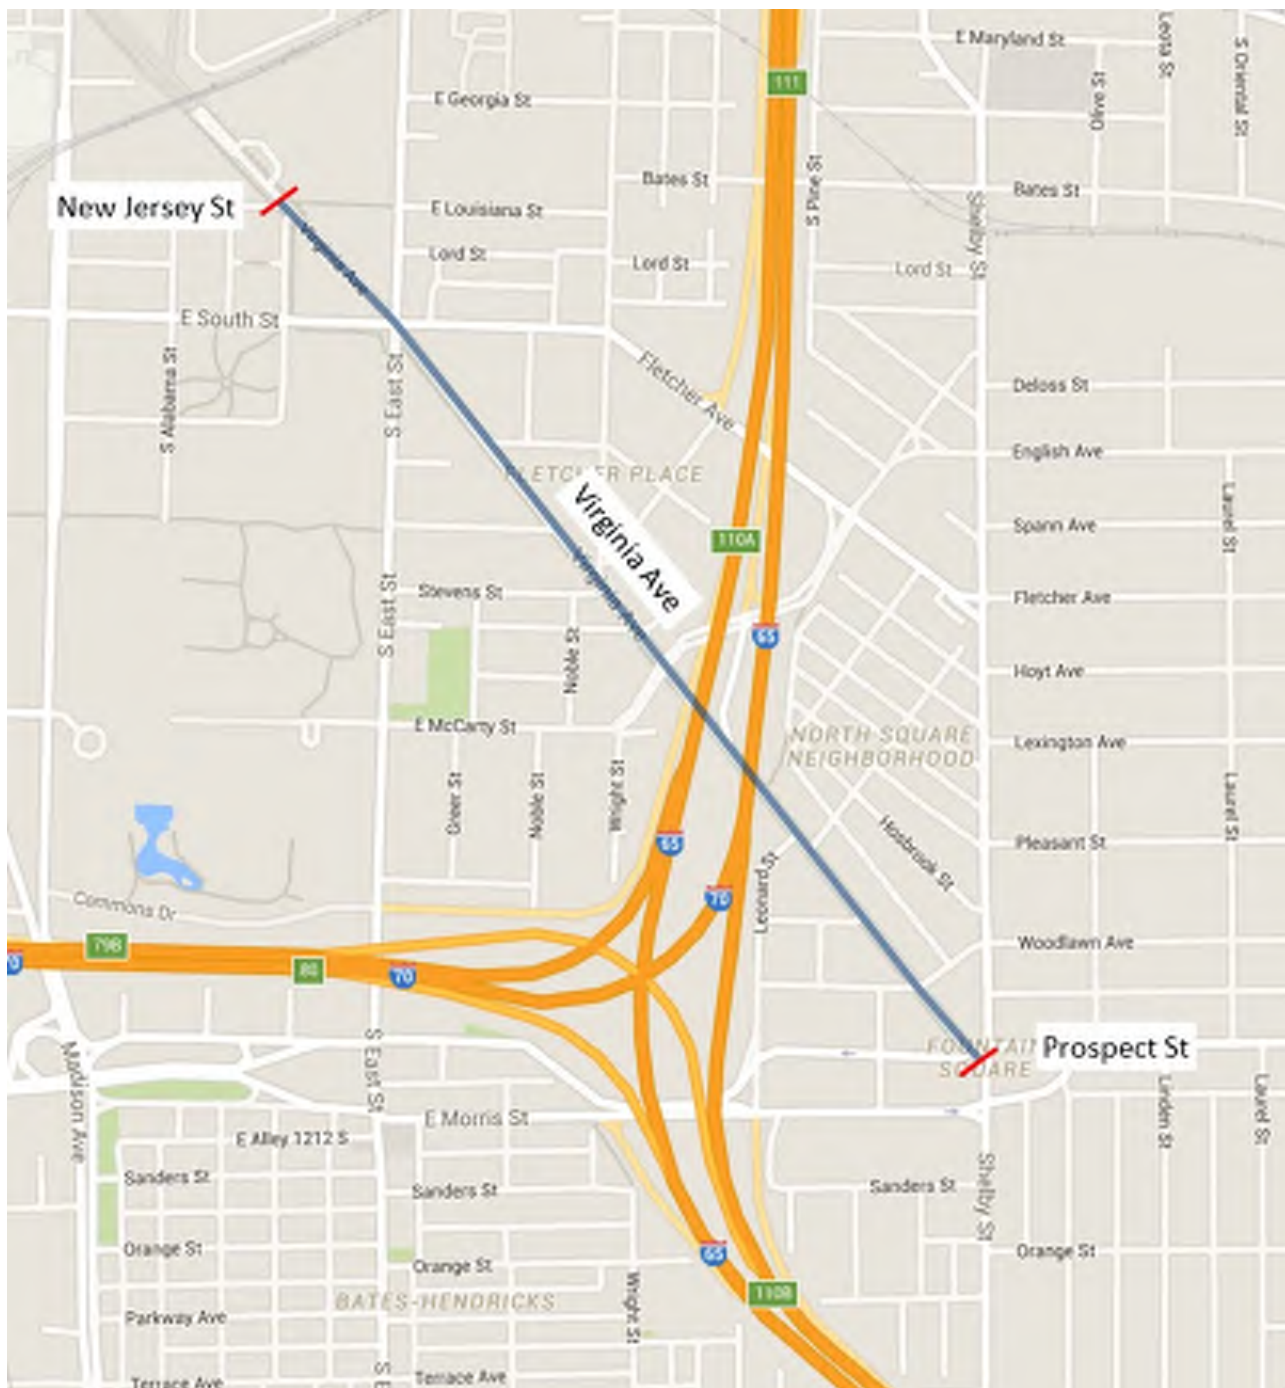

Figure 5 – Virginia Avenue Parking Inventory Limits

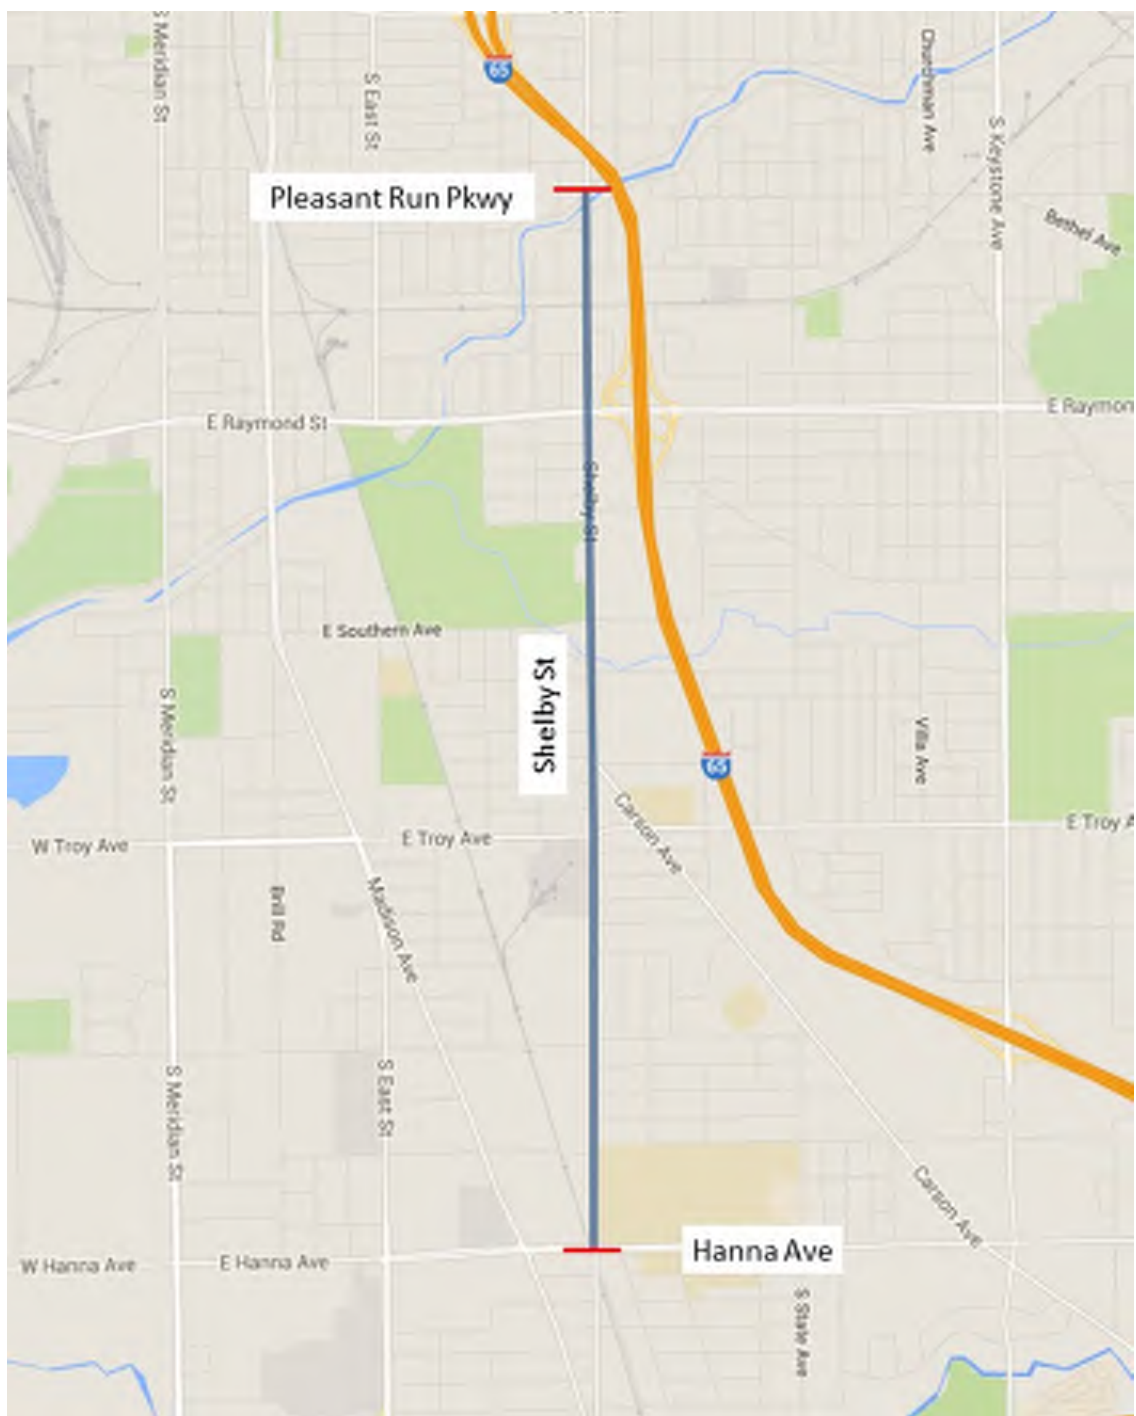

Figure 6 – Shelby Street Parking Inventory Limits

Table 1 – Parking Inventory Summary

Street Name	From	To	No. of Metered Spaces	No. of Unmetered Spaces	No. of BlueIndy Spaces
Washington Street	Delaware St	Capitol Ave	37	2	10
Maryland Street	Delaware St	Capitol Ave	69	4	0
Capitol Ave	Maryland St	19th St	315	43	5
Illinois St	Maryland St	18th St	242	108	5
Meridian St	18th St	38th St	0	430	5
College Ave	38th St	Broad Ripple Ave	22	919	15
Virginia Ave	Prospect St	New Jersey St	0	193	10
Shelby St	Hanna Ave	Pleasant Run Pkwy	0	316	0
Total			685	2,015	50

Roadway Start-to-End

The roadways included in the parking inventory were broken into intermediate segments to allow for a more detailed analysis. Segments were typically defined as a section between two major intersections. Due to Meridian Street, College Avenue, Virginia Avenue and Shelby Street consisting of mostly unmetered parking spaces, the roadway segments were more spread out.

Side of Street

The majority of the parking study roadways allow parking on both sides of the street. The BRT infrastructure may impact only one side of the street in certain instances; thus, the side of the street was denoted of where the parking space was located.

Type of Parking Space

Metered and unmetered parking spaces were the focal point of the parking study inventory. Metered parking spaces were divided into regular-metered spaces and accessible-metered spaces. Unmetered parking spaces were defined as spaces that provide free parking at all times or zones that allow free parking for a specified duration. Areas where no parking is allowed were also included in the inventory. Lastly, spaces reserved for BlueIndy vehicles were inventoried as well. A “miscellaneous” section was provided in the inventory data collection sheets to denote any additional information that may become useful for the cost estimate. **Attachment B** contains site photos captured during the field observation to demonstrate the variety of parking spaces throughout the Red Line corridor limits.

Number of Spaces

The number of parking spaces provided along each segment was recorded. Metered parking spaces were counted manually. Unmetered parking spaces were estimated based on the length of the segment and engineering judgment. The length of a parking space was assumed to be 20 feet per space; however, the roadway segments included intermittent areas where no parking is allowed. Additionally since the segments spanned multiple cross-streets, the length of each intersection (which parking on is not plausible) was taken into account for the estimate.

Parking Provisions

The parking provisions, or restrictions, may have an impact to the cost analysis. The inventory documented the sections of metered parking where parking during the AM and/or PM peak hours of the day is prohibited. It should be noted that the time period, in which payment for parking is required, varied throughout the parking study area. Payment for metered parking is generally required Monday-Saturday from 7:00am to 9:00pm. Some locations were observed to require payment Monday-Friday from 7:00am to 6:00pm. In order to efficiently collect parking inventory data, the time period for required payment was generalized to be Monday-Saturday from 7:00am to 9:00pm for all metered spaces (with the exception of peak hour and/or other restrictions).

Surrounding Land Use Type

The land use types of the areas surrounding the parking spaces were documented to determine the potential impact on the community in the instances where parking spaces may be displaced. For the purposes of the parking study inventory, the surrounding land use type was defined as either Retail or Residential. Retail land use denotes any non-residential land use type. In some instances where the land use types were observed to consist of both retail and residential land uses, the land use type was defined to be mixed.

Impact of Red Line BRT Infrastructure on Parking

The Red Line BRT bus routes may displace existing metered and unmetered parking spaces in several locations throughout the Red Line corridor. The cost for the removed metered parking spaces was determined based on the parking zone assigned to each parking space. Depending on the location of the metered parking space being impacted, it is recommended that unmetered spaces within the vicinity of the impact be converted into a metered space. The actual location of replacement parking spaces has been identified based on coordination between IndyGo and the City of Indianapolis/Park Indy. The occupancy of the unmetered parking spaces along the Red Line BRT corridor was inventoried as well.

Displaced Metered Parking Spaces

Potential locations of displaced metered parking spaces include the following roadways: Washington Street, Maryland Street, Capitol Avenue, Illinois Street and College Avenue. Based on the proposed Red Line BRT infrastructure, metered parking spaces are expected to be displaced along each of those roadways except for Washington Street. 242 metered parking spaces will be impacted by the Red Line BRT infrastructure. With the proposal to provide left-side door bus stations along the Capitol Avenue corridor, the relocation of the Bike Lane from Capitol Avenue to Illinois Street, and adding a few spaces along Capitol Avenue, Maryland Street, and Illinois Street, the net number of impacted metered spaces will be reduced to 215 spaces. **Table 2** summarizes the number of displaced metered parking spaces for each roadway. A detailed breakdown of the displaced metered parking spaces is included in **Attachment A**.

Table 2 – Summary of Displaced Metered Parking Spaces

Street Name	From	To	No. of Metered Spaces Removed	No. of Metered Spaces Added/Regained	No. of Net Impacted Metered Spaces
Capitol Ave	Maryland St	16th St	186	25	161
College Ave	38th St	Broad Ripple Ave / 64th St	14	0	14
Maryland Street	Capitol Ave	Delaware St	8	1	7
Illinois Street	Washington St	16th St	34	1	33
Total			242	27	215

Displaced Unmetered Parking Spaces

Locations of unmetered parking spaces include the following roadways: Washington Street, Maryland Street, Capitol Avenue, Illinois Street, Meridian Street, College Avenue, Virginia Avenue, and Shelby Street. Based on the proposed Red Line BRT infrastructure, unmetered parking spaces are expected to be displaced along segments of all roadways except for Washington Street. An estimated 596 unmetered parking spaces will be impacted by the Red Line BRT infrastructure. **Table 3** summarizes the number of displaced unmetered parking spaces for each roadway. A detailed breakdown of the displaced unmetered parking spaces is included in **Attachment A**.

Table 3 – Summary of Displaced Unmetered Parking Spaces

Street Name	From	To	No. of Unmetered Spaces Removed	No. of Unmetered Spaces Added/Regained	No. of Net Impacted Unmetered Spaces
Capitol Ave	Maryland St	16th St	25	0	25
Meridian Street	38th St	18th St	270	22	248
College Ave	38th St	Broad Ripple Ave / 64th St	278	0	278
Maryland Street	Capitol Ave	Delaware St	2	0	2
Virginia Ave	Prospect St	New Jersey St	16	0	16
Illinois St	Washington St	16th St	9	8	1
Shelby St	Hanna Ave	Pleasant Run Pkwy	26	0	26
Total			626	30	596

Unmetered Parking Space Occupancy

An inventory of the occupied unmetered parking spaces was collected on Wednesday July 15, 2015 between 7:00 – 8:00pm for the following corridors:

- Capitol Avenue from 14th Street to St. Clair Street
- Meridian Street from 38th Street to 18th Street
- College Avenue from 64th Street to 38th Street

Data along each corridor was collected for the same roadway segments as those summarized in the parking inventory. The occupancy of the unmetered parking spaces along College Avenue in the Broad Ripple area was collected separately from the aforementioned corridors. Due to the land uses surrounding College Avenue in Broad Ripple, primarily between 64th Street and 39th Street, parking spaces tend to have a higher occupancy on Friday nights than on typical weekday nights. The data for the Broad Ripple segments of College Avenue was collected on Friday July 24, 2015 just after 7:00pm.

The occupancy of the unmetered parking spaces has been summarized in **Attachment C**, as a percentage of the available parking spaces along the roadway segment. With the exception of College Avenue from 49th to 54th, Meridian Street from 30th to 38th, and Capitol Avenue from 11th to St. Clair, the total number of parking spaces remaining on each section surveyed would still exceed the parking use during peak usage, after construction of the Red Line. This indicated that for the majority of the corridor, parking supply will still be sufficient to handle the demand. The occupancy summary shows which roadway segments are capable of handling additional parking users in the future. Dependent upon further direction, some of the displaced metered parking spaces could be accommodated along the roadway segments with additional capacity.

Comprehensive Summary of Parking Impacts

Table 4 shows the simplified parking inventory, occupancy, and removal summary for all of the roadway segments along the Red Line BRT corridor. **Tables 5-12** show the comprehensive summary of the total number of metered and unmetered parking spaces impacted along the same roadway segments but in a “block-by-block” detailed view along the corridor.

Table 4 – Simplified Summary | Parking Inventory, Occupancy and Removal

Red Line BRT - Parking Inventory, Occupancy, and Removal Summary						
Street	From	To	Total # of Spaces (Metered + Unmetered)	# of Metered Spaces	# of Unmetered Spaces Occupied during evening retail peak hour	Net # of Metered spaces removed for Red Line ²
Washington Street	Capitol Ave	Delaware St	48	36	Not Available ¹	0
Maryland Street	Capitol Ave	Delaware St	73	69	Not Available ¹	7
Capitol Ave	Maryland St	19th St	363	315	5	161
Illinois St	Maryland St	18th St	355	242	Not Available ¹	33
Meridian St	18th St	38th St	435	0	75	0
College Ave	38th St	64th St	951	22	381	14
Virginia Ave	Prospect St	New Jersey St	203	0	Not Available ¹	0
Shelby St	Hanna Ave	Pleasant Run Pkwy	316	0	Not Available ¹	0
Total³			2744	684	461	215

Note:

1) Occupancy Data not captured since the anticipated impact to existing parking spaces is very little to none

2) Accounts for # of spaces added/regained with angled parking and/or moving Bike Lane to Illinois Street

3) Total includes 50 BlueIndy spaces that are unimpacted

Table 5 – Washington Street Segment Parking Impact Summary

Street	From	To	Side of Street	Total # of Spaces (Metered + Unmetered)	Type of Space	# of Metered Spaces	# of Unmetered Spaces Occupied during evening retail peak hour	Total # of spaces to be removed for the Red Line BRT	# of Metered spaces removed for Red Line

Replacement Metered Parking Spaces

Based on coordination between IndyGo and the City of Indianapolis/ParkIndy, new parking spaces have been identified in the vicinity of the Red Line corridor as potential areas for replacement metered parking spaces. The majority of the replacement spaces are located near the Red Line corridor in the downtown area spanning from South Street to 16th Street (south to north) and from Senate Avenue to New Jersey Street (west to east). The remaining replacement spaces are located in the Broad Ripple area near 62nd Street.

The intent of the replacement metered parking spaces is to recuperate the economic loss from the displaced existing metered parking spaces that will be removed by the proposed Red Line corridor. Therefore, in order to account for an equal monetary value attributed to each parking space, the replacement metered parking spaces have been summarized by Metered Parking Zone. The cost of a metered parking space was considered to be equivalent when comparing spaces in the same Zone.

A summary of the replacement metered parking spaces is provided in **Table 13**. Two of the locations identified as replacement spaces are subject to change based on further coordination with the City of Indianapolis. As of the date of this study, the replacement spaces are assumed to be acceptable. The following is a brief summary of the potential conflicts for the two locations:

- Delaware Street – South Street to Louisiana Street
 - 20 replacement spaces were identified along the north side of Delaware Street
 - There is currently no pavement along this section where the replacement spaces were proposed
 - Adding pavement and striping for parking is required in order to accommodate the replacement spaces
- Pennsylvania Street – Henry Street to South Street
 - 11 replacement spaces were identified along the west side of Pennsylvania Street
 - There are currently unmetered parking spaces south of this location
 - The parking spaces to the south must be converted to metered, or restricted, parking spaces in order to accommodate the replacement spaces

The block along Capitol Avenue from 11th Street to 12th Street was considered a location where metered parking spaces were added as part of the Red Line design. Therefore, the net impact of these spaces has already been accounted for in the Capitol Avenue displaced metered parking summary.

A more detailed summary of the replacement metered parking spaces is provided in **Attachment D**. The summary includes the replacement spaces that were initially identified and then provides a breakdown of which spaces are feasible (acceptable) and not feasible due to various circumstances.

Table 13 – Replacement Metered Parking Spaces Summary

	4	21
	Overall	237

¹ No existing pavement along this section. Total is subject to change.

² Unmetered spaces in close proximity of this section. Total is subject to change.

Parking Inventory Cost Analysis

The parking cost analysis summarizes block-by-block the cost to purchase displaced metered parking spaces operated by ParkIndy. Based on a comparison between the parking inventory with the proposed design plans for the Red Line BRT, a net total of 215 metered parking spaces are expected to be displaced by the Red Line BRT infrastructure. Based on the identified replacement metered parking spaces, a total of 237 spaces are expected to be added to the downtown area in the vicinity of the Red Line corridor.

The cost calculation uses information provided in the City of Indianapolis' contract with ParkIndy and the number of displaced parking spaces to determine the total cost. Parking occupancy (utilization) trend data and parking zone data from 2016 are included in **Attachment E**. The data obtained from ParkIndy was consolidated by Metered Parking Zone (Zones 1-4). The utilization data was sorted based on the 12-month average for the same time period for each zone per day. This average yearly utilization rate and the hourly rate based on the parking zone were used as the input parameters under the cost computations spreadsheet for the Capitol Avenue, Maryland Street, Illinois Street, and College Avenue roadway segments. The hourly rate information obtained from the ParkIndy Executed Concession Schedule contractual document is shown in **Attachment F**, with hourly rates sorted by parking zone.

The net total anticipated parking cost summary along the respective impacted roadway segments is provided in **Table 14**. Based on the evaluation of the displaced metered parking spaces (removed) and the identified replacement metered parking spaces (added), the net difference in parking spaces associated with the Red Line BRT corridor is a surplus of 22 spaces, which equates to a cost benefit of \$447,000. The surplus indicates that not every replacement parking space is required to recoup the full cost of the displaced metered parking spaces.

Table 14 – Net Cost Summary of Metered Parking Spaces

Zone	# of Displaced Spaces	# of Replacement Spaces	Cost²
1	47	47	\$ -
2	60	58	\$ (24,500)
3	94	111	\$ 254,000
4	14	21	\$ 217,500
Overall¹	215	237	\$ 447,000

¹Overall net cost reflects a positive benefit on the BRT Red Line project

²The cost summary was rounded to the nearest \$100

The block-by-block estimation on the displaced metered parking cost impact for Capitol Avenue, College Avenue, Maryland Street, and Illinois Street is provided in **Attachment G**. The costs for each roadway segment were then totaled by Parking Zone. The replacement metered parking cost benefit, summarized by Parking Zone, is also included in **Attachment G**.

Attachment A – Detailed Breakdown of Parking Inventory for All the Roadway Segments

Legend - Type of Parking Space									
Symbol	Description								
M	Metered								
UM	Unmetered								
M-a	Metered (accessible)								
B	BlueIndy								
N/A	No On-Street Parking								
<u>Estimation for Number of Unmetered Parking Spaces</u>									
1) Measured length of roadway segment									
2) Assumed 20' per parking space									
3) Determined proportion of segment where parking is not allowed									
4) Used engineering judgment to determine number of unmetered spaces along a segment									
<u>Description of Provisions</u>									
1) Metered spaces have varying time periods when payment for parking is required									
2) Majority of meters required payment on Mon-Fri (and some on Sat) for hours of 7am-9pm (others may be 7am-6m)									
3) Metered spaces were generalized to require payment Mon-Sat, 7am-9pm									
4) Instances where metered spaces had additional restrictions (such as no parking during peak hours) were included in the Miscellaneous section

Attachment F – ParkIndy Hourly Rate based on Parking Zone per the Executed Concession Schedule

(a) *Rate*

The maximum hourly Metered Parking Fee for any Metered Parking Space shall be as follows:

Effective Date:	Current	1/1/2011	1/1/2012	1/1/2013*
Zone 1: Downtown Core**	\$0.75	\$1.00	\$1.50	12/31/12 fee plus any increase of the Index
Zone 2: Downtown Other**	\$0.75	\$1.00	\$1.00 plus any increase of the Index	12/31/12 fee plus any increase of the Index
Zone 3: Residential**	\$0.75	\$0.75	\$1.00 plus any increase of the Index	12/31/12 fee plus any increase of the Index
Zone 4: Broad Ripple **	\$0.75	\$1.00	\$1.50	12/31/12 fee plus any increase of the Index

*Beginning 1/1/2014 and continuing until the end of the Term, the hourly Metered Parking Fee shall be increased by the percentage increase of the Index. The Concessionaire may, however, offer rate reductions at its discretion to increase utilization without effect on the above Index.

** The initial hourly rate increase to \$1.00 for each Zone will not take effect until Concessionaire has implemented electronic metering devices as set forth in Section 4.4 of the Agreement for each Metered Parking Space in each respective Zone
